Digital Citizenship Plan | 2026-27

ELBOYA SCHOOL

Digital citizenship is about using technology and participating in digital environments. It is key to helping our students learn to use available technology responsibly in the classroom and beyond. This Digital Citizenship Plan addresses how we work to build a community where we live and work together as digital citizens.

Relevant contextual information about our school and School Development Plan:

- This goal supports the School Development Plan focus on literacy by providing students with opportunities to engage with diverse digital texts, evaluate information critically, collaborate around ideas, and deepen their reading comprehension through discussion, reflection, and the ethical use of digital tools.

Relevant evidence and data that informs our Digital Citizenship Plan:

- According to CBE Student Survey Results, students share the following:
  - I learn new ways to use technology at school – 70%
  - I need the most support with checking that the information I access online is reliable – 30%
  - When I'm reading information online, I can tell if it is true or made up – 86%

Long Term Goal	Competency	Short Term Goals	Outcomes	Activities & Resources	Measures
Long term goal #1 Students and staff will leverage digital tools, including AI, to enhance learning, creativity, collaboration, and problem-solving while maintaining academic integrity and contributing positively to their learning community.	Students will develop a foundational understanding of AI and digital tools, including their benefits, limitations, and ethical use.	**Short term goal #1** Staff will design learning experiences that encourage responsible, creative, and collaborative technology use.	• Students will evaluate the strengths and limitations of digital and AI tools and make informed decisions about when and how to use them. • Students will demonstrate digital citizenship by engaging	• Classroom discussions on AI literacy and digital citizenship. • Explicit teaching about appropriate AI use. • School-wide communication with families regarding AI and academic integrity.	• Classroom observations. • Student survey data.

Long Term Goal	Competency	Short Term Goals	Outcomes	Activities & Resources	Measures
			respectfully and inclusively in online and technology-supported learning environments.		
		Short term goal #2 Staff will consistently communicate expectations around academic integrity.	• Students will identify appropriate uses of AI for learning. • Students recognize when AI supports learning and when independent thinking is required.	• Ongoing professional learning regarding AI tools. • Collaborative planning and sharing of effective practices. • Review of CBE Digital Citizenship and AI resources. • Professional discussions during staff learning meetings.	• Professional Learning • Evidence of AI-informed task design.

Next Steps and Focuses for the Coming School Year

- Continue with AI guidelines and digital safety & critical thinking.
